Petrograd Garrison, in Collusion With New Revolutionists, Brings About Change Without Bloodshed, Semi Official Russian News Agency Declares; Provisional Government No Longer in Existence, Announcement of New Party States.

### PRELIMINARY PARLIAMENT ALREADY DISSOLVED

By Associated Press

LONDON, Nov 8.—The Maximalists have obtained control of Petrograd and issued a proclamation saying the new government will propose immediate peace, the semi-official Russian News agency announces.

The Maximalists were assisted by the Petrograd garrison which made possible a coup d'état without bloodshed.

Leon Trotsky, president of the Central executive committee of the Petrograd council of soldiers and workmen's delegates, issued a declaration to the effect that the provisional government was no longer in existence and that some of its members had been arrested.

The preliminary parliament has been dissolved.

Premier Kerensky has been deposed

### MANY COUNTY BOYS WILL SIGN TO EARN \$10 FOR WAR WORK

GLOVER AND RANKIN HAVE PLURALITIES IN EXCESS OF 2,000

Campaign to Aid T. M. C. A. Opens Next Week; Speakers Explain the System

Boys of the county yesterday pledged their aid to the T. M. C. A. war fund campaign when it met in the Uniontown court house yesterday afternoon they were told how their mate would aid in the great organization's war work. The campaign will be conducted next week. Speakers have been appointed to visit each high school in the county and explain the movement.

When he becomes a member of the boys division each boy is asked to sign a pledge to contribute \$10 to the T. M. C. A. work. It is petted that this donation must be earned and a committee has been appointed in each district to direct the boys in the work and assist them in earning their \$10. Each boy is given a button to indicate that he has pledged his \$10 to the war work and is also given a certificate containing coupons. A coupon is torn off when he makes a payment on the pledge to his local committee.

I. D. Espey, Ellwood presided at the meeting yesterday afternoon. C. D. Hazel, of Seaville, director of the boys division in the T. M. C. A. moreland Indiana division, explained the system worked out for participation by boys in the T. M. C. A. camp park.

Speakers appointed to explain the movement in high schools of the end of the county are Connellsville, C. W. Baer, Dunbar and Perry township Superintendents, Mrs. S. Carroll, Dunbar township, J. F. Espey, Sherrard, S. C. Reed, P. H. Ed. hot, South Connellsville, C. D. Hazel.

Flinn, Perryopolis and Star Junction, Howard, Adams, Banning, J. L. Jones, Dickerson, Run, Dawson, and Vanderpool, F. H. Everingham, and R. J. Smith. These men are authorized to appoint as many additional committee members as desired.

### CHECK FORGER BUSY

Police Here On Lookout for Man Who Is Swindling Merchants

A letter was received here this morning from the police department of Fairmont, W. Va. warning the police of the operations of a man giving his name as O. R. Stanroos who has successfully passed bad checks on merchants in the city.

The letter says the man may be expected here about Friday or Saturday. He generally buys a suit of clothes and then after banking his money appears with a check for a sum in excess of the price of the clothes. Recurring his change he disappears taking his clothes with him. The check is later found to be bogus.

KICK ON WAR TAX

Royal Works Den Pay Much More When Arrested

There is more here for a 10-cent war tax, were male taxpayers told yesterday when John Kline, Mike Blodget and John Frederick were summoned to West Penn street car line. Constable J. J. Gimbue and arraigned before Alderman Fred Monk. One of the Kline brothers, out of town, took his place, leaving a forfeit of \$10 and did not appear this morning, nor did he appear yesterday for a hearing. The other two men were arrested on the charge which amounted to \$10 each by Alderman Monk this morning. The tax would have amounted to a nickel.

The three men were at Royal Works. They were going their from the station and conductor T. J. Neidheiser explained the tax as previous to them. The men could not understand however and before the car had reached here the conductor communicated with West Penn officials here.

Constable Gimbue read the car at Prospect and Crawford and took the three men off at Pittsburg street. The car was the one which was here at 9 A. M. Superintendent of Transportation J. R. Konser made no information. The charge being, trespass on street railway. Conductor Nederhofer was present at the hearing this morning and said he had informed the tax fully to the men who claimed they did not understand and Alderman Monk told the Kline brothers who remained for the hearing, to inform his brother that the \$10 forfeit less \$5 costs would be refunded to him if he appeared.

## WOMEN BATTLE

Girl Who Danced With Man Has Real Fight With Partner's Wife.

When a married man started dancing with a girl who was not his wife at a dance in Marlboro hall last night, and his wife "got het" to the fact, one of the most classic fights ever seen in Connellsville was precipitated. The single girl was quite polite about the thing, suggesting to the married woman that they go downstairs and settle the matter. This was agreeable to the other woman, but when the two nearly reached the door to the hall, the woman declared that she favored settling it "right here." The girl consented and the two started in. The girl came out of the fray without a scratch, but her opponent was "all cut up" and sustained a smashed hat and a torn dress in addition.

There were no arrests made but the two women and the man who had caused all the trouble were ejected from the hall.

David J. Davies, sporting editor of The Pittsburgh Dispatch, is in Connellsville today to write up high school athletic activities. Mr. Davies was at one time in the newspaper business here.

## Election Oddities

Twenty-seven South Connellsville electors voted yesterday for a dead man. The name of J. E. Shope as Socialist candidate for assessor appeared and the ballot, and the 27 marked crosses behind his name. Mr. Shope died about two weeks ago.

A vote was cast in the Fourth ward here yesterday for H. George May for Judge. James R. Gray, who opposed Judge Van Swearingen at the primaries polled a half dozen votes throughout the city. Frank Lape got one in the Second ward.

The Fourth ward led in the number of freak votes cast. Voters who did not care to vote for John Duggan for mayor gave a vote apiece to J. L. Evans, D. A. Ripley, and J. Kurtz.

Some other Fourth ward man voted for Mayor R. McFate for council, and there was a vote for Alderman W. L. Colborn for controller.

Harry Hopkins, encumbrance candidate defeated in the primaries, polled eight votes in the Sixth and one in the Seventh for a council seat. Guy Clark A. G. Bixler got a vote for mayor in the Seventh, and Joseph Cypers one for school board in the same ward.

## S. CONNELLSVILLE VOTE

Borough Republicans Win Connell Auditorship and Election Board.

South Connellsville went strongly Republican yesterday with but a few exceptions. H. M. Cherpman, Democrat, and present tax collector, was elected to succeed himself, defeating Thomas C. Phalin, Republican candidate, by 139 votes to 105. Mr. Phalin was also in the race to succeed himself as justice of the peace. Whether he was elected or not depends on whether the vacancy created by failure of Frank Pierce to serve is filled by popular vote or appointment by the governor. Mr. Pierce was elected two years ago, but did not assume the office. Mr. Phalin polled 179 votes, for the office and Harry Adams 131.

If Mr. Pierce's place is to be filled by yesterday's election, Mr. Phalin will be one of the borough's justices of the peace. Otherwise Mr. Adams will be the only one to serve.

Council will be Republican. The winning candidates were V. S. Fisher, 177; C. A. O'Neill, 96; and W. S. Tracy, 151. Clarence E. Pinkerton, William R. Shupe, and R. R. Whipple, their opponents, polled respectively, 92, 82, and 78. School director, H. I. DeBolt received 110 votes to 108 for A. W. Doblick. Mr. DeBolt ran on the Democratic and Socialist tickets. For auditor, Walter Arzman, Republican, received 102 to 63 for Carl Freshley, Democrat, for the two year term, while for the four year term G. G. Gey, Republican, won out C. D. Barkley, Republican, was selected judge of election, M. R. Weimer and Walter P. Wandel, inspectors, and Mansfield Hyatt, assessor.

## COAL MEN MEET

Conier on Steps to Prevent Threatened Shortage.

By Associated Press.

WASHINGTON, Nov. 7.—Directors of the National Coal Association, representing bituminous coal operators with a yearly output of 23,900,000 tons, met here today to frame a comprehensive program for dealing with the threatened coal shortage.

Primary consideration will be given to co-operation with the railroads to obtain an adequate car supply and quicker movement of cars when loaded.

Reports from eastern and Middle Western coal fields indicate the coal shortage has reduced the output of these mines.

There is every indication, according to members of the association, that cold weather still further will reduce output unless immediate remedial steps are taken and that serious em-  
barrassment to all users of bituminous coal.

the boys have decided that the easiest  
and best way is to ask for a little  
space in The Courier and I have taken  
the job of filling it. We receive  
The Courier about every day and we  
certainly do enjoy it and look forward  
to its coming.

Our barracks is among the best in  
camp. It was not completely equipped  
when we arrived but lots of work was  
done on it and it is now in fine shape.  
Then the company we were originally  
assigned to was split up and now  
only six of the men who came with  
the second increment are all that re-  
main in the 24th. They are W. H.  
Fulmer who has been appointed mess  
sergeant, J. F. Wim-grove, Dawson  
Albert, Rans, Thurman, Butler, Earl  
Martin and myself. All of us have been  
promoted to be sergeants.

Mart Ringer who came with us is  
quartering at our barracks although  
he has been transferred to headquar-  
ters company and during the day sees  
that no one walks away with the  
rifles.

We see the other boys from home  
quite often as some of them are qua-  
rered in our barracks though no  
others are scattered about over the  
camp. We understand however that  
they are all well.

If any of you at home are any worry-  
as to how the boys are treated can  
safely say that all are well taken care  
of. The officers are fine in fact.

Company 24 boasts of the finest cap-  
tains in the camp and the regular army  
men with us are perfect gentlemen. I  
believe the same can be said of all  
other units.

The boys have to keep clean and  
everything about them must be kept  
scrupulously. Clothes must be kept in  
good order. You have to be shaved often and  
other things too numerous to mention  
have to be done. The boys seem very  
much interested in the drills and we all  
agree that the life will be a great  
honor to us. Our bodies are being  
developed and every one of us is in  
the best of health.

Sergeant J. W. Wim-grove is happy  
as his father and brother are visiting  
him. Andy was appointed a temporary  
company clerk until the new company  
arrives.

Sergeant Earl Martin is one of the  
happiest boys in the company. He is  
of good natured and has a smile for  
everybody. I suppose it is all due to  
the fact he gets letters about  
three times a week from a certain  
young lady in Connellsville. Anyway  
he is making good in the army but  
is up a snappy drill and a potent  
with the boys.

Right now we are enjoying the  
festivities of a Halloween party  
carried out by our esteemed Thurnau  
but postponed. Wogontown B. S.  
is giving good health and is looking  
forward to the party.

Miss Sergeant Fulmer is kept bus-  
y in the kitchen and is giving the boys  
a blanket to keep us warm.

You should meet our top sergeant  
P. M. Pringle a dandy fellow and a  
real Southerner from Florida. He  
invited us to visit his orange  
grove there when the war is over and  
we had a good time.

He has invited us to think out  
plans for the many fun things  
he will show us since we have not  
particularly George Cochran for the  
cigarettes the boys enjoyed at his  
expense. And you can see for me that  
I am one and alone with a lot of  
friends.

## San Felice Cigar Now 6c

### Advance in Raw Material Costs Necessitates Small Increase in Price

The rise in cost of raw materials, in  
particular tobacco, has been so great  
during the past year that it is now  
impossible to continue to sell  
the San Felice cigar at the  
present price. The San Felice  
Company has decided to increase  
the price of San Felice to 6c.

iron trade tomorrow as follows:

Government fixing of the iron  
and steel market is now practically  
completed with this week's announcement  
of basic prices for sheet, im-  
plates, pipe and wire. The basic  
prices made a harmonious structure  
and the direction of each item being  
worked out by the manufacturers  
chiefly by the manufacturers of the  
market. It is now complete with the  
market level of two months ago.  
While on the other hand there are a  
few more than double the average  
prices quoted during the six months  
ended with Jan.

On Saturday the market was  
held in the set prices and busi-  
ness is being done. As far as produc-  
tion is concerned, the market is  
now being held for early deliv-

OUR MOTHERS OF '14.

The solemn pride and grief a country  
displayed by those near of an to the  
American soldiers who were killed  
killed or captured in Germany  
show the magnitude of a nation's loss.  
Instead of throwing themselves  
into a frenzy of grief and weeping  
they consoled themselves by longing for the  
sacrifice of their loved ones they faced  
the reality of the situation with  
singular fortitude. Thus they suffered  
the distress at the loss of those near  
to them but they were proud that the  
last news which had been made were  
so soon the country's honor.Attention has often been called  
to the patriotic inclination of the  
fathers of Private F. W. W. who paid  
that his boy had died in the for his  
country and not in the war expenses  
sign by the side of P. W. W. as a sign  
showing the spirit which can be  
those to whom the country war has  
been greatest. Differing in mood  
and form of expression is the result  
of the mothers of the boys who were  
captured and who may have met with  
worse fate than a person of the  
Germans. When Mrs. Anna Mihal  
whose son was among those captured  
was apprised of the fact she said  
proudly and with only a faint  
tear in her eye.I knew he would do great  
in great when he got over to France. He  
is too bad but I am not worried the  
Germans will not think of coming to  
them if they treat us as bad.

With mothers like these I implore

them to a faithful discharge of their  
duty and if need be to me be an  
heroically and unflinchingly we  
will present a stand of admiration  
of the deeds our boys will  
perform and we too will be proud to  
know that we are brother Americans.

SLACKERS OF THE JOHN

Never before in the history of  
American elections have other dis-  
charged their duties so conscientiously  
quite so wide variety of conditions.  
At the center of polling place here  
was nothing but a vast expanse of  
a Philadelphia the day previous to the  
voting of voters or peace  
in the army depots and training camps  
there was little or no ordinary action  
except the crowds were gathered which  
the voters were polled. It was among  
the forces in France that the real  
nobility was found.The voter of an organization  
he news it comes state in a British  
sector were cast under bombment by German guns. The engi-  
neers immediately worked their  
hands in a sharp behind the lines as  
Germans had twisted overhead.The voter was engaged for a  
few minutes with the voter and elec-  
tions were cast in a hasty and

EAST TO GET COAL

Priority Order Diverts Shipments From Western to Eastern Points.

To relieve the threatened coal short- age in the New England states and the east the Priority Board has modified the regulations for the transportation of bituminous coal for the northwest via Lake ports, so as to divert eastward much of the coal which since August has been going to the west.

This order recalled from 22 rail- roads operating in Western Pennsyl- vania and adjacent territory the order requiring carriers to grant precedence to bituminous coal shipments destined for trans-shipment by water to Lake Superior or Lake Michigan ports.

Roads released from the priority regulations are the Pere Marquette & Lake Erie, the Baltimore & Ohio, east of Pittsburgh, and Parkersburg and Wheeling W. Va.; Cheery Tree & Dixonsville; Cumberland & Pennsylvania; Dan's Run; East Broad Top; Erie; Huntingdon & Broadtop; Kittanning Run; Lake Erie; Franklin & Lake; Monongahela; Morgantown & Kingwood; New York Central—east of Buffalo; Monon; Pennsylvania; Pittsburgh terminal; Washington Run; West Virginia Northern; Western Maryland, and the Union company, Pittsburg.

APPLYING PENALTY

To Prevent Interruption to Operation in the Coal Mining Districts.

The application of the penalty provi- sions to the non-union mining dis- tricts has been worked out on a basis which the Fuel Administration be- lieves will prevent strikes and lock- outs and insure more regular opera- tion of the mines.

A form of regulations adopted by the Somerset and Cambria county operators, who have granted an in- crease in wages, and approved by Ad- ministrator Garfield, has been posted at the mines in these districts. The regulations provide if the men walk out the operator is to collect and turn to the government for the use of the Red Cross a penalty equivalent to \$1 per day per man.

If the operator locks out the men the fuel administration collects a sim- ilar penalty from the operator. In no case of strike may the operator com- promise by suspending part or all of the penalty. Should an operator fail to rigidly enforce the agreement he becomes personally liable for all of the fines uncollected.

## Iron is Greatest of all Strength Builders, Says Doctor

A Secret of the Great Endurance and Powers of Athletes

Ordinary Nuxated Iron Will Make In- feafe, Nervous, Run-down People 100 Per Cent. Stronger in Two Weeks' Time in Many Cases

NEW YORK, Nov. 7.—Athletes are going to the gymnasium to get renewed health and strength from some stimulating medicine, said Dr. G. Sauer, a Boston Physician, who has studied weakly both in this country and in Germany. Endurance of the human frame, as a matter of scientific interest, may go on for years when the patient suffers untold agony. If you are not strong or well, you are not yourself to make the following diet: See how many you can eat in half an hour, walk without becoming tired. Next, take two five-grain breads of ordinary Nuxated Iron three times per day after meals for two weeks. Then test your strength again and see for yourself.

When you have obtained a high state of strength, you may add a few more grains of iron to your diet.

From the "New York Times": "From the time of the first use of iron in the human system, the iron has been a most potent remedy in nearly all forms of indigestion, as well as for nervous, run-down conditions. The iron-takers have such great confidence in the iron that they will take it in doses of 100 to 150 grains, the older, the greater the iron.

It is easily assimilated, does not injure the system, and is not irritating to the stomach. On the contrary, it strengthens the system, and gives the patient a sense of well-being.

NOTE.—Nuxated Iron is recommended now by Dr. G. Sauer, one of the newer organic iron compounds, the older, the greater the iron.

And so he was rather contented than otherwise as he made his way in the direction of the coast for while he enjoyed the liberty and the savage pleasures of the wild his heart longed at the same time to be clear for he knew that he was doing all that lay in his power to return to his parents. He looked forward to meeting white men—creatures of his own kind for there had been many occasions upon which he had longed for other companionship than that of the old ape.

And at last the much dreaded moment came. They were passing through a tangled forest when the boy's sharp eyes discovered far in the lower branches through which he was traveling an old but well marked spear—a spear that set his heart to leaping

breath at useless torture being inflicted upon the helpless slaves.

He looked at the boy. Now that he had caught up with the creatures of his own kind why was it that he did not rush forward and greet them? He put the question to his companion.

"They are dead," muttered the boy.

"I would not travel with such as them for if I did I should sit upon them and let the first time they beat their people as they are beating them now. But," he added after a moment's thought, "I can ask them the where abouts of the nearest port and then Akut can leave the m

The boy made no reply and the boy swung to the ground and started at a brisk walk toward the water. He was a hundred yards away before he was out of the whites' sight at the water hole.

The man gave a shout of alarm in steadily leveling his rifle upon the boy and firing. The bullet struck out in front of the mark, scattering sand and fallen leaves against the boy's legs. A second later the other white and the black soldiers of the rear guard were dragged down by the two powerful beasts of prey who leaped upon them from both, exchanging limb or from the ambush of the underground beside the trail to the water hole in the ford.

Akut and Jack, now called Kora, in the ape language were moving slowly down the water, not warily because the advantage was with whatever beast might chance to be hunting ahead of them where their spear was being held by the light breeze.

"Suddenly the two hunted simultaneously. Two men were cooked upon a stone. Like creatures leapt from the rock they stood immovable, straining.

For several seconds they remained thus. Then Kora advanced cautiously a few yards and leaped nimbly into a tree. Akut followed close upon his heels. Neither had made a sound that would have been appreciable to his ears at a dozen paces.

Stopping often to listen they crept forward through the trees. That both

Jack was disheartened and sad. He had not entirely recovered from the depressing effect of the unfriendly reception he had received at the hands of the blacks, and now he had found an even more hostile one accosted him by men of his own color.

The lesser beasts fled from me to terror he murmured half to himself, the greater beasts are ready to tear me to pieces at sight. Black men would kill me with their spears or arrows. And now white men, my own kind have fired upon and driven me away.

Are all the creatures of the world my enemies? Has the son of Tarzan no friend other than Akut?

The old ape drew closer to the boy. "There are the great apes," he said. "They only will be the friends of Akut's friend. Only the great apes will welcome the son of Tarzan. You have seen that men want nothing of you. Let us go now and continue our search for the great apes—our people."

Both the White Men Were Wielding Heavy Whips Brutally

—the spear of men, of white men, for among the prints of naked feet were the well defined outlines of European made boots.

The trail, which marked the passage of a good sized company pointed north at right angles to the course the boy and the ape were taking toward the coast.

Doubtless these white men knew the nearest coast settlement. They might even be headed for it now. At any rate, it would be worth while over-taking them even if only for the pleasure of meeting again creatures of the same kind.

The boy was in the lead, excitement and anticipation carrying him ahead of his companion. And it was the boy who first saw the rear guard of the caravan and the white men he had been so anxious to overtake.

Stumbling along the tangled trail of those ahead a dozen heavily laden blacks who, from fatigue or sickness, had dropped behind were being prodded by the black soldiers of the rear guard, kicked when they fell and then roughly jerked to their feet and hustled onward. On either side walked a giant white man, whose heavy broad beards almost obliterated their countenances.

The boy's eyes formed a glint of calculation as his eyes first discovered the whites—a try that was never uttered, for almost immediately he was seized that which turned his happy mood to anger as he saw that both the white men were wielding heavy whips brutally upon the naked backs of the poor devils staggering along beneath loads that would have overtaxed a strong man of the world.

Every now and then the rear guard and the white men cast apprehensive glances rearward as though mightily expecting the instigation of some long expected danger from that quarter. The boy had passed after his first sight of the caravan and now was following slowly in the wake of the world brutal spectacle.

Presently Akut came up with him. To the boy there was as no horror in the look than to the lad for ever the great ape growled beneath his

breath at useless torture being inflicted upon the helpless slaves.

And on in the jungle an hour march from the village the sheik was leading his returning caravan home.

A year had passed since the white men had fired upon the lad and driven him back into the jungle to take up his search for the only remaining creature to whom he might look for companionship—the great apes. For months the two had wandered everward deeper and deeper into the jungle.

The year had gone much for the boy—turning his already mighty muscles to the work of developing his wood craft to a point where it verged upon the uncanny. Perfectly he absorbed instinct and training him in the use of both natural and artificial weapons of defense and attack.

He had been at last a creature of marvelous physical powers and mental command. He was still but a boy, so great was his strength that the powerful antelope with which he often engaged in mimic battles was no match for him. Akut had taught him to fight as the bull ape fights, never was there a teacher better fitted to instruct in the savage war art of no man or a pupil better equipped to profit by the lessons of a master.

As the two searched for a band of the still extinct species of apes to which that belonged they lived upon the best the jungle afforded. Antelope and zebra fell to the boy's spear or were dragged down by the two powerful beasts of prey who leaped upon them from both, exchanging limb or from the ambush of the underground beside the trail to the water hole in the ford.

Akut and Jack, now called Kora, in the ape language were moving slowly down the water, not warily because the advantage was with whatever beast might chance to be hunting ahead of them where their spear was being held by the light breeze.

"Suddenly the two hunted simultaneously. Two men were cooked upon a stone. Like creatures leapt from the rock they stood immovable, straining.

For several seconds they remained thus. Then Kora advanced cautiously a few yards and leaped nimbly into a tree. Akut followed close upon his heels. Neither had made a sound that would have been appreciable to his ears at a dozen paces.

Stopping often to listen they crept forward through the trees. That both

tree to her side. Most likely she would scream and run away. Then would come the men of the village with swords and guns and set upon her. They would either kill him or drive him away.

A lump rose in the boy's throat. He craved the companionship of his own kind though he hardly realized how greatly. He would have liked to slip down beside her though he knew from the words he had overheard that she spoke a language with which he was unfamiliar.

At last he hit upon a plan. He would attract her attention and reassure her by a smiling greeting from a greater distance. Silently he crept from his way back into the tree. It was his intention to kill her free beyond the palisade giving her the feeling of security which he imagined he stout barricade would afford.

He had scarcely left his position in the tree when his attack was as treated by a considerable noise upon the opposite side of the village. By moving a little he could see the gav at the far end of the main street.

A number of men, women and children were running toward it. It swung open revealing the head of a caravan up the opposite side. It crept in mostly organization—black slaves and dark haired Arabs of the northern deserts, cursing camel drivers urging on their vicious charges overburdened camels, waving wildly pendulous ears while they endured with stoic patience the brutalities of their masters' goats and sheep and horses.

Into the village they all trooped behind a tall, sour old man who rode without greetings or those who shrank from his path directly to a large goat skin tent in the center of the village.

Here he spoke to a wrinkled black

Kora from his vantage point could see it all. He saw the old man asking questions of the black woman and then he saw the latter point in the direction of the tree beneath which the little girl played.

A grim smile curved the thin cruel lips of the Arab. The child seemed to claw away but before he could get out of reach the old man leaped brutally sending her sprawling upon the grass. Then he followed her up to sit and strike her as was his custom.

Abreave them in the tree he beast crept and toward that he made his way. A great tree overhanging the enclosure at the very point from which the voice came into this Korak crypt.

His spear was ready in his hand. He was told him of the proximity of a human being. All that his eyes required was a single glance to show him his target, then lightning-like the missile would fly to its goal.

With raised spear he crept among the branches of the tree, crouching downward in search of the retreat of the one who had risen to him from below.

As just he saw a human hand. The spear hand flew to the limit of the throwing position to gather the force that would send the iron shaft missile completely through the body of the unconscious victim. And then the killer paused. He leaned forward a little to get a better view of the target.

He lowered his spear cautiously that it might make no noise, by scraping against foliage or branches. Quietly he crouched in a comfortable position along a great limb and there he lay with wide eyes looking down in wonder upon the creature he had crept upon. The sheik was dead.

"When he regains his senses he will kill me," she said in Arabic.

Kora could not understand her. He shook his head, speaking to her first in English and then in the language of the sheik. But neither of these were intelligible to her.

## COKE AND BY-PRODUCT COAL GIVEN PRIORITY OVER OTHER FREIGHT

Fuel Administration Takes  
Drastic Step to Insure a  
Fuel Supply.

### FOR MUNITIONS PLANTS

Order Effective Immediately; Will Be  
Backed by Full Power of Government; Cars to Be Taken Wherever  
Found; Region Will Cooperate.

From the Weekly Courier.

The Fuel Administration and War Industries Board having definitely come to the conclusion that in order to win the war there must be no interference with the continuous and strenuous operation of the industries engaged in the manufacture of war munitions and supplies, are agreed that drastic measures must be taken to insure a fuel supply. This decision followed a conference in Washington this week attended by representatives of the steel, coke and by-product coal producers.

To meet this situation a Priority Order has been issued giving shipments of coke and by-product coal preference over every other form of freight, including commercial coal. To carry this order into effect cars suitable for this traffic will be requisitioned from every available source and all the power of the Fuel Administration employed in its execution. The order becomes immediately effective, notice of its issuance having been given to both the railroads and the coke operators and producers of by-product coal.

Every effort will be made to cooperate with the government to the fullest possible extent in the matter of increasing production and facilitating the movement of fuel under this order. The operation of the coke region having so long been restricted by labor and transportation conditions to about 65 to 70 per cent of capacity, it will be quite out of the question to immediately expand to 100 per cent which can be reached only with a full quota of both cars and men. As a result of the continued shortage of cars, and irregularity in placing them, which has prevailed with more or less severity during the whole of the current year, the number of available workmen at the plants has been reduced far below the force which will now be necessary to man them for 100 per cent production. While the shortage of men has been a more or less chronic condition, the fact that a majority of the plants were unable to run full time has caused a large number of men to seek other employment. When it has been demonstrated that under the new Priority Order a full supply of cars can be had, and full time guaranteed coke workers, the high rates of wages and generally satisfactory working conditions in the region will, it is expected, draw many men back into the industry. In such event a full capacity production can be attained by degrees but it will of necessity be preceded by several weeks of rather slow recruiting of an adequate force of men.

That there is urgent need for some energetic measure to be taken in the matter of a better car supply, if it is hoped to keep the steel and munitions plants generally in operation, was illustrated again last week when shipments of coke were but 332,344 tons. While this an increase from the extremely low mark of 306,594 tons during the previous week, it is yet far below the average of the region of the past ten months, during which time there has been insistent appeals from the furnaces for more coke, and still more coke.

Pay day, the observance of All Saints' Day and the shortage of cars all tended to make last week's record a poor one, but it was really better than had been expected, bearing in mind the exceptionally poor showing of the week preceding. Car supply thus far this week is practically the same as last week and conditions on the whole are about the same. Some parts of the region report no accessions of men; others report detections indicating a shifting about, as has become a habit of some, rather than a net gain in the total number.

For the week ending Saturday, November 3, the shipments by rail aggregated 9,638 cars, carrying 327,684 tons, consigned as follows:

Westinghouse Cars	Tons	
Pittsburg District	3,314	115,103
West Pittsburg	5,083	175,125
Mass. of Connellsville	1,173	39,501

River shipments were 4,780 tons, increasing the consignments to Pittsburg to 115,865 tons and to Western points to 177,125, and the total movement to 332,344 tons, a gain of 650 tons by river and 25,000 by rail, or a total of 25,754 tons.

Big Loss in Use of Coal.  
"Of the world's coal mined, 1,325,000,000 tons is wasted in heat radiation and other losses," was the statement recently made by L. C. Harvey during the course of a talk in London on "Fuel Economy." In 1910 the coal mined in the world was about 1,300,000,000 tons, and according to Mr. Harvey it was improbable that anything like 5 per cent was ever turned into actual useful work.

Prudence those who advertise.

### USE OF OPEN TOP CARS LIMITED

Transporting Coal, Ore, Coke, Limestone and Raw Materials Required in the National Defense.

Having found that open top cars, other than flat and work cars, which are suitable for the transportation of commodities essential to the national defense and security, are being utilized in the transportation of the less-essential commodities and articles to such an extent as materially to interfere with the transportation of the commodities required in the conduct of industries necessary in the prosecution of the war, Judge Robert S. Lovett, administrative officer under the priority of shipment act, has issued an order that priority be accorded coal, coke, ore, limestone, sugar beets, sugar cane, sorghum cane, and raw materials for use in the metal, sugar, and fertilizer industries and other commodities required in the national defense and security, in the use of open top cars.

Directs that until further orders all common carriers by railroads in the United States in the distribution of open-top cars, other than flat cars, and in the transportation of freight in such cars shall deny the use of open-top freight cars, other than flat cars, to shipments of the following commodities and articles, except in shipments for the United States Government, viz:

1.—Materials and supplies, other than coal, for the construction, maintenance, or repair of public or private highways, roadways, streets, or sidewalks.

2.—Materials and supplies, other than coal, for the construction, maintenance, or repair of theatres or other buildings or structures to be used for amusement purposes.

3.—Materials and supplies, other than coal, for the manufacture of pleasure vehicles, furniture, or musical instruments.

4.—Passenger vehicles, furniture, and musical instruments.

### CAN CHARGE HIGHER RATES

Railroads of West Virginia Given Permission to Increase Coal Freights 15 Cents Per Ton Within State.

The Public Service Commission has entered an order allowing the applications of 12 railroads operating in West Virginia for permission to put into effect coal freight schedules providing for an advance of approximately 15 cents a ton on intra-State traffic. The order provides that the new rates shall be effective for a period of one year from November 2, or until the further action of the commission. Chairman Morgan disengaged from the minority opinion, holding that the advance should not exceed 10 cents on the ton.

The advance in rates was allowed as a war measure, it being the opinion of the commission that the request for more revenue was justified by present conditions. There were few protestants to the application, it was stated by the commission in announcing its decision. Only about 3 per cent of the coal shipped by the railroads affected is in intra-State traffic, it was further explained.

The following railroads will benefit by the advance in rates: Baltimore & Ohio, Chesapeake & Ohio, Coal & Coke, Kanawha, Michigan, Kanawha & West Virginia, the Monongahela, Monongahela & Kingwood, Norfolk & Western, Pittsburgh, Cincinnati, Chicago & St. Louis, Pittsburg & West Virginia, Virginia and Western, Maryland.

15,000 More Cars to France.  
It is announced that the United States will soon order 15,000 more cars for the use of the army in France, raising the total number of cars which it has purchased to between 50,000 and 60,000.
